

2022 Summer Seminar Series

- June 2** **David Jenkins, University of Central Florida Department of Biology**
[*One things leads to another: from zooplankton to global human resource consumption*](#)
- June 9** ***Environmental Justice Seminar***
Nick Speed, Founder and President of Ujima
[*Justice and Healing through Urban Agriculture*](#)
- June 16** **Erynn Maynard-Bean, SCS Global Services Greenhouse Gas Verification Program**
[*Shedding light on invasive shrubs in eastern deciduous forests*](#)
- June 23** **Danielle Lee, Southern Illinois University Edwardsville Biological Sciences**
[*Evaluating and working along environmental gradients to develop frameworks to understand nuisance rodent ecology*](#)
- June 30** **Brett Scheffers, University of Florida Department of Wildlife Ecology and Conservation**
[*Using studies across space and time to inform the ecology of climate change*](#)
- July 7** ***Owen Sexton Seminar***
David Reznick, University of California Riverside Department of Biology
[*Chapter 3: The Struggle for Existence*](#)
- July 14** **Camille Delavaux, Eidgenössische Technische Hochschule Zürich**
Mycorrhizal fungi mediate plant species interactions: consequences for forest structure
- July 21** **Kaylee Arnold, University of Georgia Odum School of Ecology**
[*Investigating the gut microbial communities of a disease vector across fragmented landscapes*](#)
- July 28** **Desirée L. Narango, University of Massachusetts Amherst Department of Environmental Conservation**
[*Using plant-animal interactions to inform habitat management and conservation in human-dominated ecosystems*](#)
